

IT3120 - Modern Enterprise Management

Workshop 1 – Introduction to Management and Marketing

Objective

The objective of this activity is to enable students to apply fundamental **management and marketing concepts** to real-world business situations by analyzing a contemporary organizational case study. Through collaborative discussion and problem-solving, students will evaluate managerial and marketing challenges, integrate theoretical knowledge with practical decision-making, and propose strategic recommendations. The activity also aims to strengthen students' critical thinking, teamwork, communication, and presentation skills while exposing them to a variety of industries and business contexts.

Group Formation

- Form groups of **8 students**.
- Each group will receive **one unique case study**.
- Read the assigned case carefully.
- Each group will deliver a **10-minute presentation**, followed by a short Q&A.
- During this week's workshop, **7–8 groups** will present.
- The remaining groups will present during **next week's session**.

Presentation Requirements:

Each group will deliver a **10-minute presentation** covering:

1. Introduction to the case (1 minute)
2. Key management analysis (3 minutes)
3. Key marketing analysis (3 minutes)
4. Integrated recommendations (2 minutes)
5. Conclusion (1 minute)

Case Studies (One per Group)

Case Study 1: PickMe – Building a Student Super
--

AppPickMe has successfully expanded beyond ride-hailing into food delivery, grocery delivery, parcel services, and digital payments. The company now plans to launch a lifestyle platform specifically for university students, offering learning resources, fitness services, event updates, and exclusive discounts. While students are highly active online, they are also price-sensitive and have many competing digital platforms to choose from. PickMe must design a strategy that attracts students, delivers value, and builds long-term loyalty while managing rapid business growth.

Case Study 2: Dialog Axiata – Enhancing Customer Experience through Digital Transformation

Dialog Axiata has invested heavily in digital services including mobile banking, entertainment platforms, online customer service, and self-service mobile applications. However, increasing customer expectations, growing competition, and service quality concerns require the company to continuously improve customer experience while managing operational efficiency. Dialog must balance technological innovation with personalized customer service.
--

Case Study 3: Keells – Smart Retail Innovation

Keells has introduced self-checkout counters, mobile payment options, loyalty programmes, and online grocery shopping to improve customer convenience. While these initiatives increase efficiency, some customers still prefer traditional shopping experiences, and employees must adapt to new technologies. The company seeks to improve operational efficiency without reducing customer satisfaction or employee engagement.

Case Study 4: MAS Holdings – Sustainable Manufacturing for Global Markets

MAS Holdings has become an international leader in apparel manufacturing by focusing on innovation, sustainability, and ethical business practices. Increasing global demand for environmentally friendly products requires MAS to continuously invest in green technologies while maintaining productivity, controlling costs, and motivating a diverse workforce operating across multiple countries.

Case Study 5: Daraz Sri Lanka – Improving E-Commerce Customer Experience

As one of Sri Lanka's largest online marketplaces, Daraz serves millions of customers with thousands of sellers. Customer complaints regarding delayed deliveries, inconsistent product quality, and after-sales service have affected customer satisfaction. Daraz must strengthen seller management, improve logistics, and build customer trust while maintaining rapid business growth.

Case Study 6: Cargills Food City – Expanding Omnichannel Retail

Cargills has expanded its online ordering and home delivery services alongside its physical supermarkets. Customers now expect seamless shopping experiences across mobile apps, websites, and physical stores. The company must integrate digital technologies, improve inventory management, and deliver consistent customer experiences while remaining competitive in the retail market.

Case Study 7: Cinnamon Hotels & Resorts – Digital Tourism Recovery

Following changes in global travel demand, Cinnamon Hotels aims to attract both international tourists and local travellers through personalized digital experiences, loyalty programmes, and sustainable tourism initiatives. The company must improve service quality, strengthen employee performance, and effectively market its unique customer experiences while responding to changing customer expectations.

Case Study 8: SriLankan Airlines – Service Recovery and Brand Reputation

SriLankan Airlines is working to rebuild customer confidence after operational challenges, flight delays, and increasing competition from regional airlines. The airline plans to improve customer service, strengthen employee engagement, modernize its digital services, and reposition its brand as a reliable and customer-focused airline.

Case Study 9: Toyota – Managing Innovation through Lean Production

Toyota continues to lead the automotive industry through Lean Manufacturing and continuous improvement. However, the transition toward electric vehicles and smart manufacturing presents new challenges in technology adoption, employee training, supply chain management, and changing customer expectations. Toyota must maintain efficiency while encouraging innovation.

Case Study 10: Netflix – Retaining Customers in a Competitive Streaming Market

Netflix faces increasing competition from global streaming services offering exclusive content and lower subscription prices. The company must use customer data, artificial intelligence, and content personalization to retain subscribers while balancing investment in original productions and managing global expansion.

Case Study 11: Starbucks – Creating Customer Loyalty through Digital Innovation

Starbucks has successfully integrated mobile ordering, digital payments, and loyalty programmes into its customer experience. However, increasing competition and changing consumer preferences require Starbucks to continuously innovate, strengthen employee engagement, and maintain consistent service quality while expanding digital customer interactions.

Case Study 12: Apple – Launching the Next Generation of Smart Devices

Apple is preparing to launch a new generation of wearable smart devices integrated with artificial intelligence and health monitoring features. The company must coordinate global product development, manage cross-functional teams, maintain product quality, and create effective marketing strategies that reinforce its premium brand positioning.

Case Study 13: Airbnb – Building Trust in the Sharing Economy

Airbnb connects travelers with property owners worldwide. As the platform expands, it faces challenges related to customer trust, safety concerns, regulatory compliance, and maintaining consistent service quality. Airbnb must improve customer experiences while balancing the needs of hosts, guests, and local communities.

Case Study 14: Tesla – Scaling Operations while Maintaining Innovation

Tesla continues to expand electric vehicle production while investing heavily in autonomous driving technology and renewable energy solutions. Rapid growth has increased operational complexity, requiring improvements in leadership, workforce management, production planning, supply chain coordination, and customer relationship management.

Case Study 15: Uber – Expanding Services in Emerging Markets

Uber is expanding beyond ride-sharing into food delivery, freight services, and digital mobility solutions in emerging markets. Differences in customer behaviour, local regulations, and competitive pressures require Uber to adapt its management practices and marketing strategies while maintaining service quality and operational efficiency.

Case Study 16: IKEA – Sustainability and Customer Experience

IKEA aims to become a fully sustainable retailer by introducing circular economy initiatives, renewable materials, and environmentally friendly supply chains. At the same time, customers increasingly expect convenient digital shopping experiences, personalized services, and affordable products. IKEA must integrate sustainability, technology, employee engagement, and customer value into its long-term business strategy.
